

BURIED FIREWATER PIPING

Application: Underground firewater lines in a refinery with operating pressure of 225 psi

Location: Petroleos de Venezuela, S.A. (PDVSA) Cardon Refinery, Venezuela

Product: 3,000 feet of 14" diameter FM piping

Features & Benefits: Fiberglass piping is cost effective alternative to carbon steel. External corrosion resistance, superior to stainless and carbon steel, extends expected service life in corrosive soil conditions.
