

## Ash Pond Return Piping

**Application:** Ash pond return lines for coal burning, electricity-generated plant. Water is returned from ash settlement ponds either for recycling as ash sluice water or for treatment.

**Location:** Georgia Power Company - Albany, Georgia

**Product:** Over 4,000 feet of 18"-30" diameter Big Thread® pipe and more than 60 elbows, reducers, flanges, and other accessories

**Features & Benefits:** Fiberglass piping is corrosion resistant throughout and provides cost savings versus coated steel. The piping is available in 40 ft. lengths vs. steel's 20 ft. lengths resulting in fewer field joints.
