

Calcium Chloride Processing

Application: Above ground

Location: Louisiana

Product: 1,000 feet of 2" - 6" Centricast® CL 2030 pipe and fittings

Features & Benefits: CL 2030 pipe is manufactured with high strength glass fabrics and a highly resilient formulation of corrosion resistant vinyl ester resin. The pipe is recommended for most highly chlorinated or acidic mixtures up to 175°F and many other chemicals up to 200°F. The proprietary resin provides toughness for many corrosive slurries.

The system installation for this project was coordinated between the factory, distributor, and local fabricator. CL-2030 pipe and fittings are available in sizes 1"-14" diameters.
